**New Virtual Machine Wizard**

**Virtual Hard Disk Options**

Before you can install an operating system on this virtual machine, you must add a new or existing virtual hard disk to it.

A virtual hard disk is a .vhd file that is stored on your physical hard disk and is used to contain the guest operating system, applications, and data files.

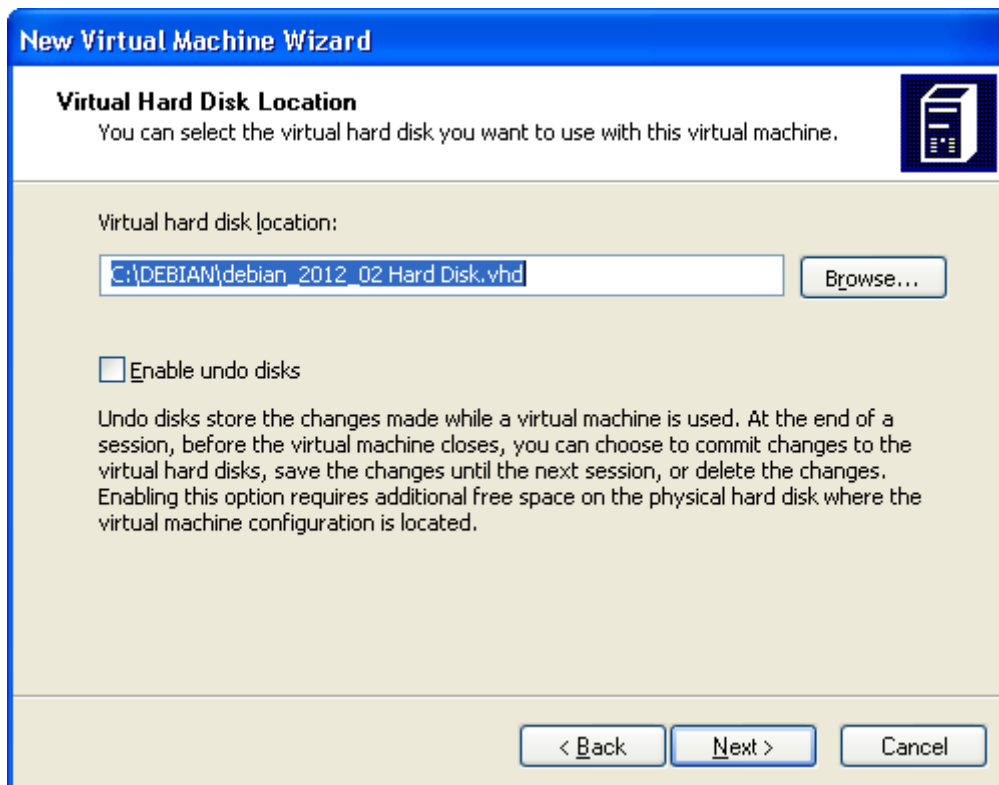

The first virtual hard disk you create or select for your virtual machine is called Hard Disk 1 in Settings and is the startup disk.

Do you want to use:

- ☒ An existing virtual hard disk
- ☐ A new virtual hard disk
